Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

① 10 minutes

Team gathering

Set the goal

Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

Think about the problem you'll be focusing on solving in

the brainstorming session.

Learn how to use the facilitation tools

Use the Facilitation Superpowers to run a happy and

productive session.

Define your problem statement

Current methods for detecting eye diseases face accessibility and cost challenges. Our project aims to develop a user-friendly Deep Learning Model for Eye Disease Prediction, using advanced technologies to enhance accuracy and seamlessly integrate with healthcare systems, addressing barriers to early detection and improving overall eye health outcomes.

① 5 minutes

PROBLEM

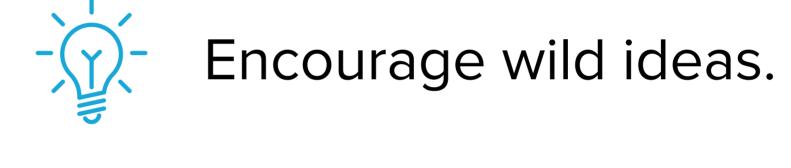

Deep Learning Model For Eye Disease Prediction

Key rules of brainstorming

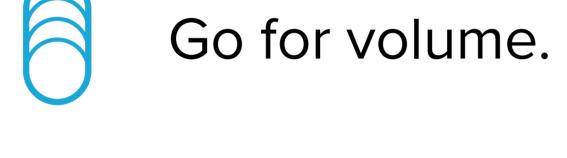

To run an smooth and productive session

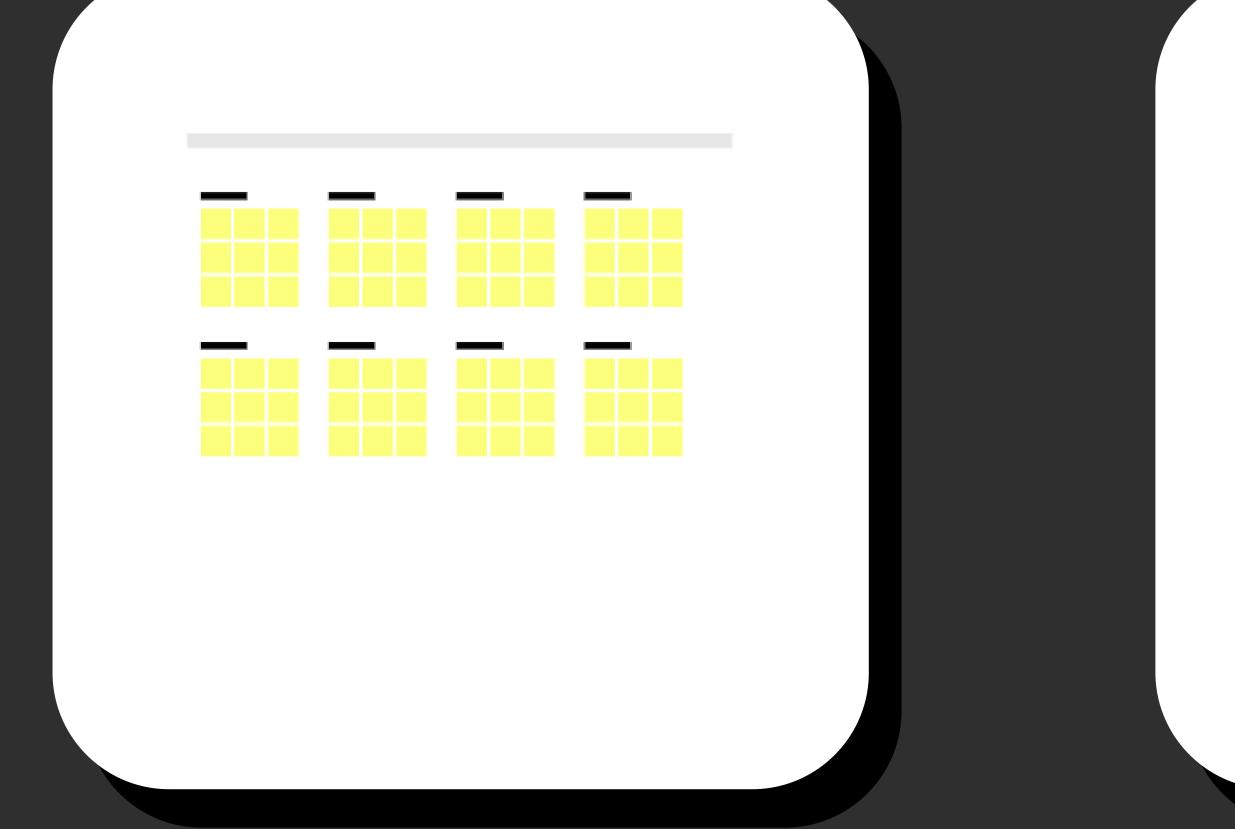

Brainstorm

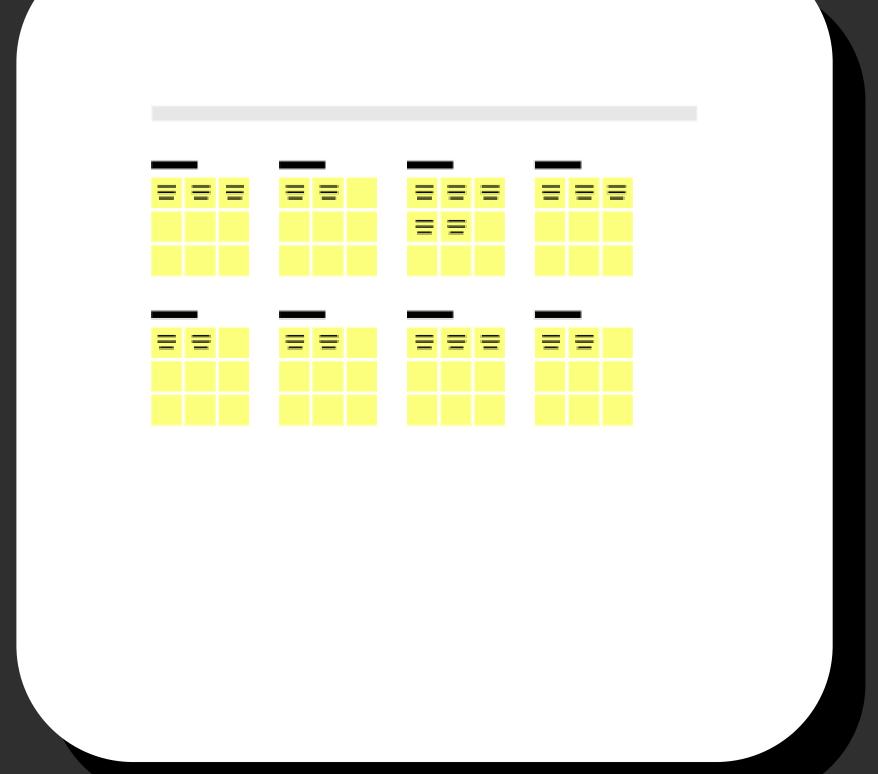

Write down any ideas that come to mind that address your problem statement.

① 10 minutes

You can select a sticky note and hit the pencil [switch to sketch] icon to start drawing!

Malik Develop a system Include high- Integrate social Create an Develop an intuitive Prioritize accessibility Implement a feature Introduce gamification Implement an ensemble that dynamically fineexplainability module contrast themes features to enable onboarding process by incorporating allowing users to set elements, like badges learning strategy, combining predictions tunes the model within the app, and adjustable with step-by-step users to share voice-guided and track and challenges, to based on user data providing users with font sizes to guidance, ensuring achievements and navigation, allowing from diverse deep personalized eye motivate users in and feedback, insights into how the users of all abilities learning models, to accommodate consistently using the users with visual health goals, experiences, model reaches specific ensuring continuous enhance accuracy and tool, making eye health promoting proactive impairments to can easily users with varying fostering a sense improvement and predictions, enhancing robustness in identifying monitoring a rewarding experience. interact seamlessly understand and use engagement and visual abilities and transparency and user trust. of community adaptability to various eye diseases. with the app. goal-oriented usage. the app. preferences. evolving patterns. around eye health. Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

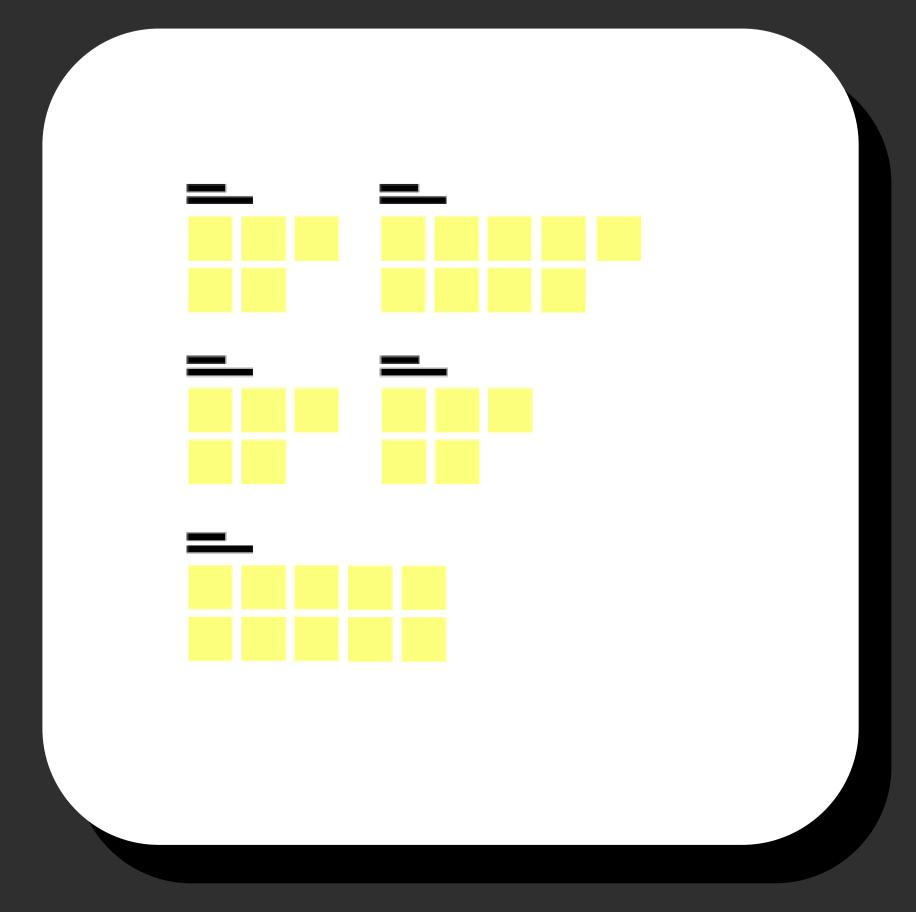

① 20 minutes

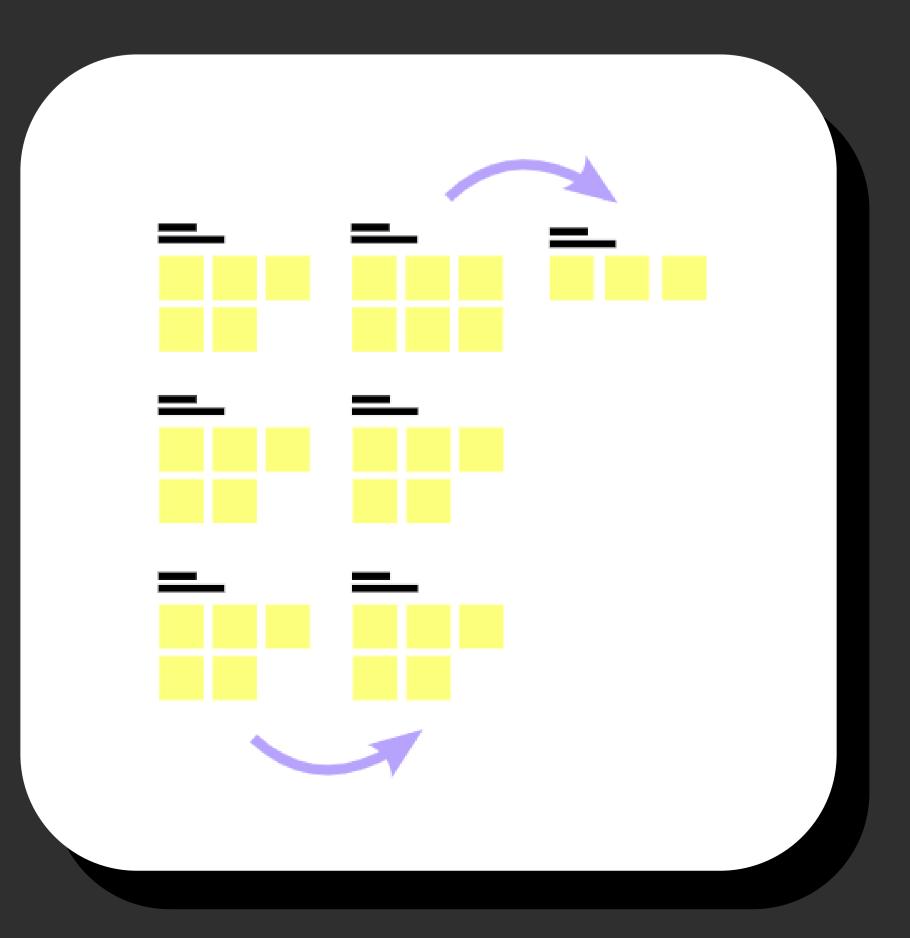

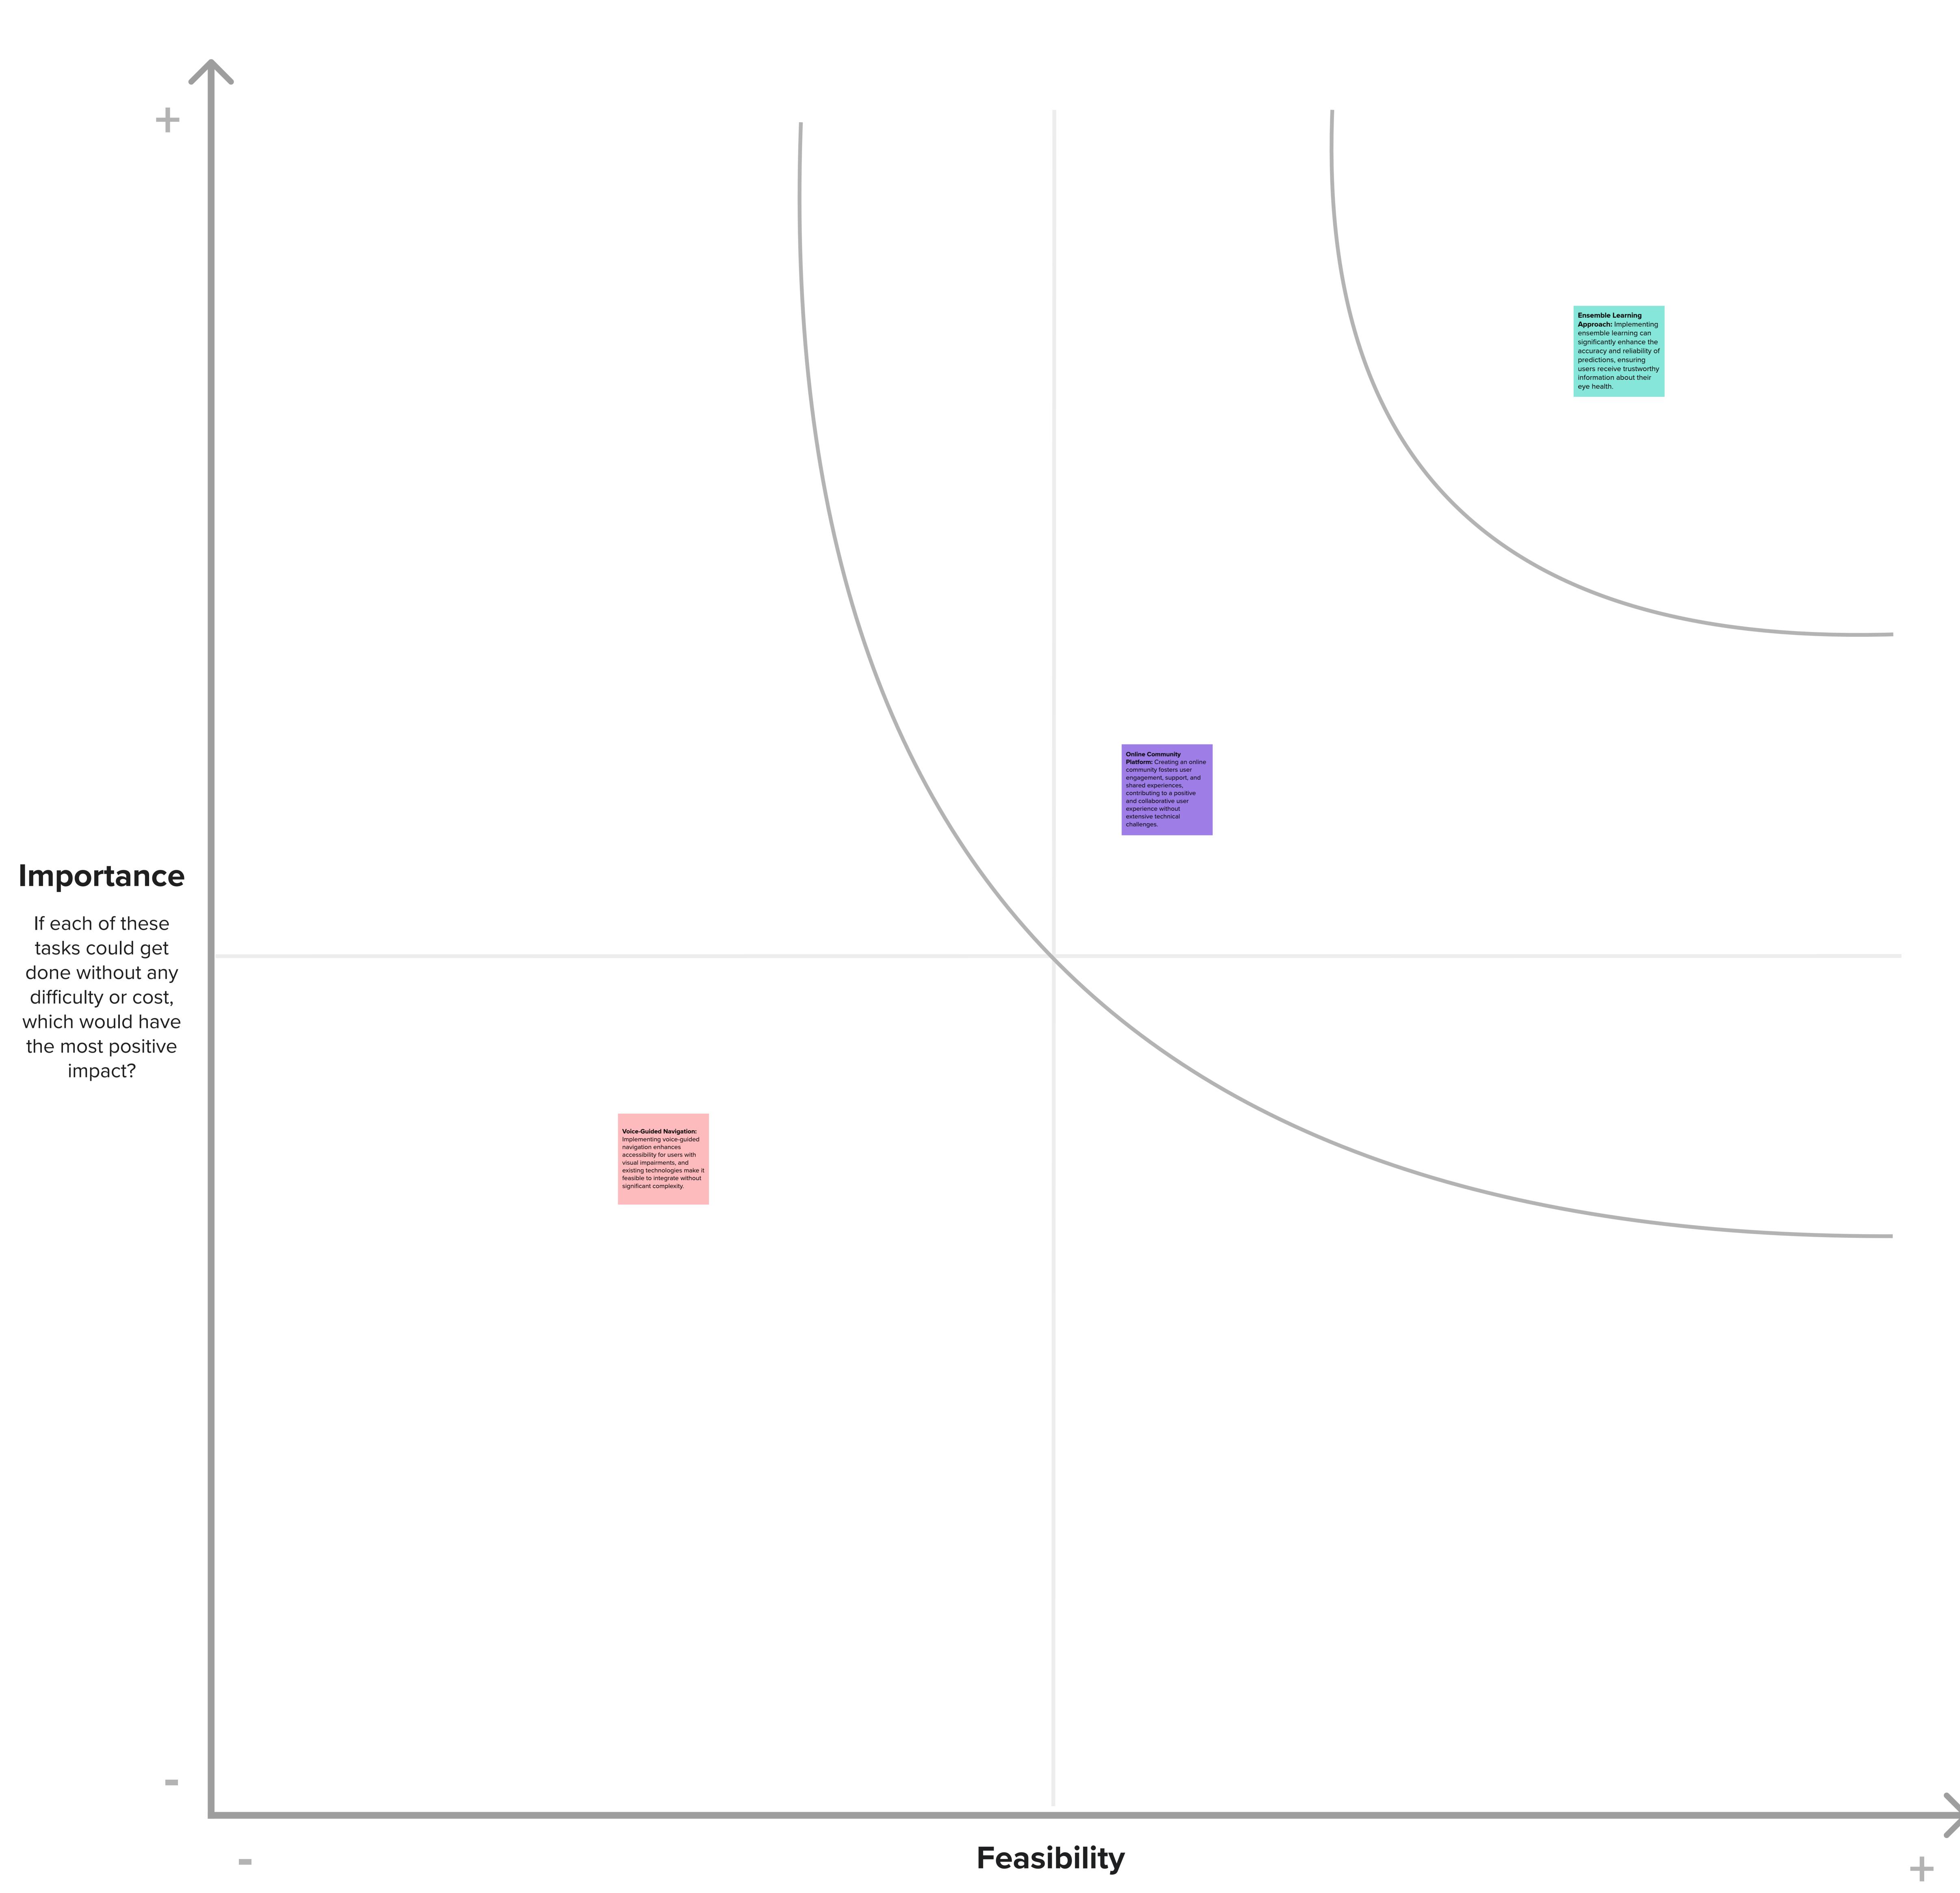

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

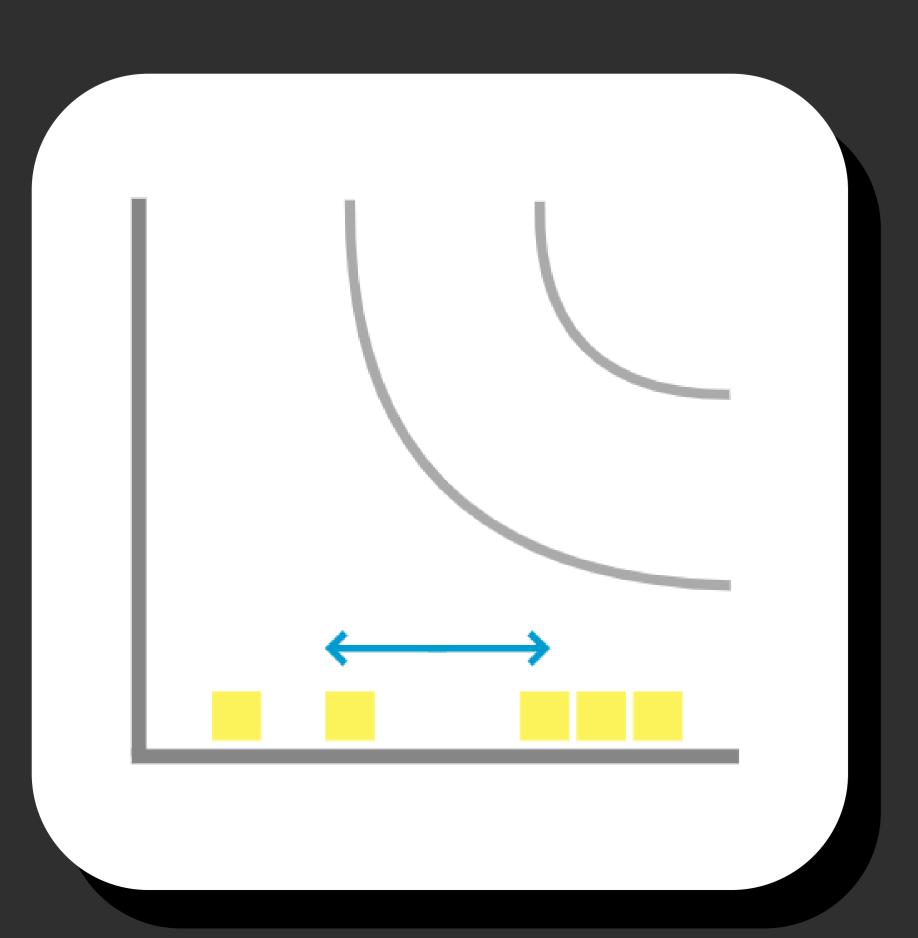

① 20 minutes

TIP

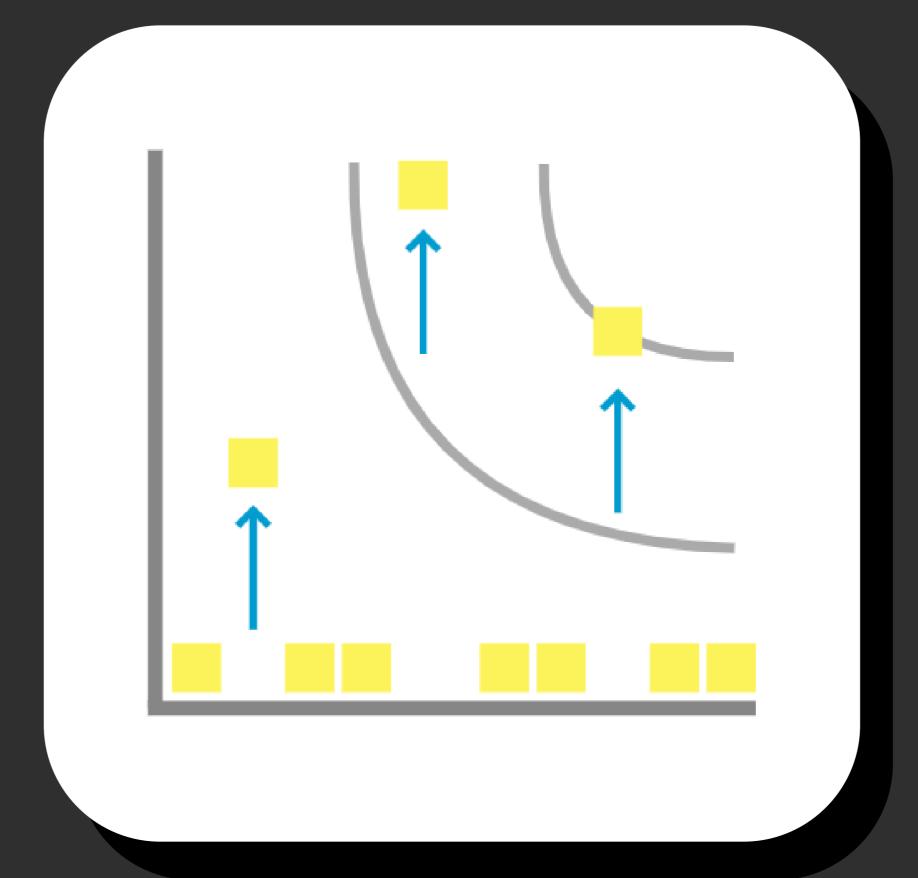

Participants can use their cursors to point at where sticky notes should go on the grid. The facilitator can confirm the spot by using the laser pointer holding the **H key** on the keyboard.

Regardless of their importance, which tasks are more feasible than others? (Cost, time, effort, complexity, etc.)

After you collaborate

You can export the mural as an image or pdf to share with members of your company who might find it helpful.

Quick add-ons

Share the mural

Share a view link to the mural with stakeholders to keep them in the loop about the outcomes of the session.

Export the mural

Export a copy of the mu

Export a copy of the mural as a PNG or PDF to attach to emails, include in slides, or save in your drive.

Keep moving forward
